Fall Planting Edition 1930

WEBER'S QUALITY TREES *and* PLANTS

FALL PLANTING days are with us;
it is a joy to know that they are here.
Fall is the planting season ideal. Weather
conditions are most favorable; soil can be
handled, and there is more time to plant
properly. Ask us about it.

Terms of Sale

Please Read Carefully

TERMS INVARIABLY CASH.

REMIT BY POSTOFFICE OR EXPRESS MONEY ORDER ON ST. LOUIS, MO., REGISTERED MAIL TO AFFTON, MO., OR BY DRAFT. Do not send private checks unless drawn on some St. Louis Bank. Address all correspondence to **H. J. Weber & Sons Nursery Company, Affton, Mo.**

C. O. D. ORDERS must be accompanied with at least 25 per cent of the amount in cash. If shipped by express, you pay the balance to your express agent upon delivery of goods. If by freight, you pay the balance at your bank, where you will find the bill of lading, which you present to the freight agent, who will deliver shipment to you. Always give us name of bank you wish us to send bill to. We deliver free of extra charge to any freight depot, express office, or boat landing in St. Louis, Mo.

NON-WARRANTY CLAUSE.—If Nursery Stock proves untrue to the name under which it is sold by us, a replacement of the stock, as originally ordered, without charge, or a refund of the purchase price shall be a complete satisfaction of our liability. Except for such liability we give no undertaking or warranty, express or implied, as to description, quality, growth, productiveness, or any other matter of any Nursery Stock we sell.

We assume no liability for delays in delivery or for non-delivery of Nursery Stock caused by frost, fire, flood, drought, hail, strikes, embargoes, war, or other causes beyond our control.

We recommend Fall planting of Hardy Phlox, Japan-Oriental and German Iris, Oriental Poppy, Delphiniums, Paeonias, Lillium Candidum, Sedum in assortment, Statice Latifolia, Bleeding Heart, and Lily of the Valley during the month of September.

Most varieties of Evergreens may safely be transplanted during September and October, providing there is sufficient moisture in the soil. All kinds of Fruit trees, Grape Vines and Blackberries may also be set during October and November.

Fall planting has some advantage over Spring planting in as much as the newly set shrubs and trees become established in the soil before winter sets in, thus insuring an earlier growth in spring, consequently a great many shrubs will bloom the first year and withstand the dry weather during the hot summer months.

Ornamental trees, shrubs, climbing Roses and Vines may be successfully transplanted in the Fall, after we have had sufficient frost to check growth and defoliate the plants.

We will gladly advise upon request, which plants are not suitable for Fall planting.

You are kindly invited to visit our Nurseries and inspect the stock at which time we will also advise when, how and where to plant. We are conveniently located on Gravois and Weber roads, just a short ride from any part of the city; your visit should be both pleasant and profitable.

If it is not convenient for you to call we will be pleased to send our representative to talk these matters over with you. We welcome the opportunity to assist you at any time. "That is part of our Business."

For complete advice on terms, conditions and general remarks, kindly refer to our general descriptive Guide for 1930. If you do not have copy, one will be mailed on request.

H. J. Weber & Sons Nursery Co.

 ***We extend a cordial invitation to visit our Nurseries. Our offices will be closed Sunday excepting during September, October and November, also March, April and May, when we will have open Sundays from 8 to 11:30.***

Hardy Perennials

Our Perennials are well grown and stocky plants.

There are only a few varieties of Perennials that are safely transplanted in the fall. Our Perennial plants are all potted in the fall and carried over winter in cold frames. This keeps them in good condition, and if planted in early April produce a crop of flowers the first season. There are some varieties that should be planted in September and October. These will be quoted in this list. Varieties not quoted in this list will be quoted in our 1931 Catalog and Guide.

SCALECIDE

THE COMPLETE DORMANT SPRAY

"Makes a Tree Outgrow Its Troubles"

Known for many years as the most effective dormant spray for scale and many other pests. We have used it exclusively for twenty-eight years. Scalecide alone does all that any combination of dormant sprays can do. It controls scale of all kinds (fall or spring). It controls peach leaf-curl (fall). It controls aphids and pear thrips

without nicotine (delayed dormant). It controls leaf roller and European red mite (delayed dormant), neither of which is controlled by lime-sulfur even with nicotine. It controls pear psylla (fall or early spring). It controls bud moth and case-bearer (fall or spring). It controls fire-blight and fungous cankers (fall or spring). In addition to all these things Scalecide invigorates trees.

One gallon of Scalecide makes enough spray to cover the same trees with equal thoroughness as 3½ gallons of lime-sulfur. Use 1 gallon of Scalecide to 15 gallons of water, or 3 gallons to 50 gallons of water. Spray only on days when the temperature is above 40°. Scalecide is pleasant to use—it does not injure even the eyes.

SPECIAL REDUCED PRICES on barrel lots, for shipment prior to January 1st, 1931.

CAUTION

Conforming to the National Insecticide and Fungicide Act, our responsibility ceases when a partial quantity of Scalecide is dispensed from barrel or cans. We guarantee Scalecide only when purchased in original packages.

Carboleine A safe and effective low-priced oil spray. It mixes instantly in any kind of water and stays mixed. Diluted 1 to 20, Carboleine kills scale, aphids and many other pests. But it does not have fungicidal or invigorating properties and does not control fire-blight cankers—Scalecide is the only oil spray that has these advantages. Price \$26.00 per 50-gal. barrel F. O. B., St. Louis, Mo.

Proportions

For small quantities of spray solution, these figures will help you to get the proper mixture. Be accurate.
